

Discover Primary Science & Maths

Guided tour of the Galway Atlantaquaria

During this interactive tour study some of Ireland's amazing marine and freshwater Sea life, get the opportunity to interact with local marine species and feed some of our fish.

Add one or more of the following options to receive your DPSM certificate and educational pack:

Option A: Science Experiments, suitable for all classes

Bring Science to life in our Explorers Classroom. Carry out a number of experiments to look at the properties of water, pressure, hydraulics and more. Workshop finishes with a rocket launch!

Option B: Animal Anatomy, suitable for all classes

Learn about variety and characteristics of living things by taking part in our show and tell class, students will get to examine lobster moults, sharks teeth, mermaid's purses and many more marine bio facts. Explore the processes of life during a squid dissection.

Option C: Seashore Safari, suitable for senior class

Take a trip to our local shore, Grattan Beach to learn about Galway's seashore life. Identify the animals and plants found there and how they live together. This activity is **subject to weather and tides** and can be carried out with a maximum of 30 children.

Option D: Explorers Maths Workshop suitable for senior class

Celebrate Maths with your students by carrying out an Explorers Maths workshop. Designed for Maths week, this workshop involves a guided tour of the aquarium, with maths integrated into a number of educational activities like, shape, space activities and numbers fishing game in our classroom.

Option E: Engineering Trail & Workshop suitable for all classes

Join the **Engineering Trail** of Galway Atlantaquaria. The workshop includes a guided tour of the aquarium, which follows this trail, plus an Investigation into designing coastal defences and barriers in our Explorers Classroom.

Cost from €6.75 per student
